

JFSP Success Stories

We invite stories that demonstrate both the successes and challenges of implementing JFSP-funded fire science research. We want to know how outcomes of science are leading to tangible impacts in the work of practitioners, lives of stakeholders, and resiliency of fire-impacted landscapes. We these stories will inspire others.

Please send your completed form and any supporting documents, files, etc to:
Coleen Haskell, JFSP Communications Director chaskell@blm.gov

1. Your Email address

2. Your Contact information

Name

Title

Agency/Organization

Phone

3. Success Story Title

4. Success Story Summary

Please provide a narrative describing in plain language how the results of this scientific project were used "on the ground" by fire and/or fuels managers, including any challenges that were overcome.

5. Which part of the Fire Science Community do you represent?

Wildland Fire Fighter, Fire/Fuels Manager, or Fire Ecologist (Consumer/User of science)

Fire Science Researcher (Producer of science)

Other (List)

6. Results/Impacts/Outcomes

Include key impacts on fire and/or fuels management or policy. What were the short term outcomes? Did short term types of outcomes lead to long term outcomes? What were the quantifiable results such as the number of acres treated, costs avoided, etc. Describe any implications of these results. Who/what/where benefited -and how much?

7. Interagency Impacts

If this story is about a collaborative effort, explain JFSP's role in relation to its partners.

8. Which categorie(s) of outcomes apply?

Affirm current management guidelines

Led to a subtle change in management guidelines and/or practices

Led to a significant change in management guidelines and/or practices

Led to a change in policy

Led to a change in public perception

Led to a positive outcome in firefighter safety, community preparedness, or landscape resilience

Other (describe below)

9. Geographic Impact

Describe the geographic area where this project takes place (i.e. which Forest or District?)
Include a central GPS location for potential story map or place-based outreach products.

10. Which FSEN exchange(s) from the map above were involved with this success story?

Alaska Fire Science Consortium

Consortium of Appalachian Fire Managers and Scientists

California Fire Science Consortium

Great Basin Fire Science Exchange

Great Plains Fire Science Exchange

Lake States Fire Science Consortium

North Atlantic Fire Science Exchange

Northern Rockies Fire Science Network

Northwest Fire Science Consortium

Oak Woodlands and Forests Fire Consortium

Pacific Fire Exchange

Southern Fire Exchange

Southern Rockies Fire Science Network

Southwest Fire Science Consortium

Tallgrass Prairie and Oak Savanna Fire Science Consortium

11. Moving forward

Describe the next steps that build on this success story. Include future goals or plans that might result in ongoing activities. How can end users continue to implement the results of this research? How does JFSP and the Fire Science Exchange Network fit into those plans to deliver the science?

12. Supporting documentation and visual images (2 recommended) Websites, photos, maps, tables, etc.

Provide a caption/description for each piece of supporting documentation that you will be attaching to your story. If the story is taken from a website, please provide a web url. Please ensure we have permission to use photos by including credits in the captions/descriptions below.

13. Key words:

List any key words, separated by ; that may be used in searches and queries to access this story.

14. Publications, Articles, or Website links

The following describe how science results led to impacts and successes in fire and/or fuels management. If you email your story to chaskell@blm.gov, attach these publications as well.

15. Additional Information

Provide any additional information that you would like to share about this success story.

Email your completed form and any supporting documents to: Coleen Haskell,
JFSP Communications Director chaskell@blm.gov
